#### configurations

- LightSheer Duet with HS Exciting new alternative for those seeking high-speed, comfortable treatments to offer your patient population, and increase your patient throughput.
- LightSheer Duet with ET & HS Versatile platform for those focused on practice growth, enables a customized approach across the broadest range of patients and treatment areas.

#### specifications

PLATFORM	LightSheer DUET			
SYSTEMS AVAILABLE	LightSheer ET	LightSheer HS		
Technical Specifications				
Laser Type	AlGaAs Diode Arrays	AlGaAs Diode Arrays		
Wavelength	805 nm (nominal)	805 nm (nominal)		
Spot Size	9 mm x 9 mm	22 mm x 35 mm		
Repetition rate	Up to 3 Hz	Up to 3 Hz		
Pulse Repetitions	1 pulse	1 – 3 pulses		
Fluence	10 - 100 J/cm <sup>2</sup>	4.5 - 12 J/cm <sup>2</sup>		
Pulse Width (OptiPulse™)	5 - 400 ms	30 - 400 ms		
Peak Power	1600 W	2300 W		
Comfort Management	ChillTip™ contact cooling (5°C)	Vacuum-Assist (up to 18 inHg)		
Preset Parameters	Yes	Yes		
Warranty	1 Year	1 Year		
On-Site Service	Yes; replaceable handpiece	Yes; replaceable handpiece		

#### Platform Specifications Electrical 100-240 VAC, 15 A max. 50/60 Hz single-phase grounded outlet Weight 48 kg (105 lbs) Dimensions (WxDxH) 44 x 50 x 112 cm; (17.4 x 19.7 x 44 in)

### ightSheer DUET

High Speed Permanent Hair Reduction

RETHINK THE BUSINESS OF HAIR REMOVAL

<sup>&</sup>lt;sup>1</sup> Klavuhn KG. Illumination Geometry: The Importance of Laser Beam Spatial Characteristics. Lumenis, 2001.

FDA cleared for hair removal and permanent reduction in all skin types (Fitzpatrick I-VI) and tanned skin; PFB (pseudofolliculitus barbae); superficial leg veins; benign pigmented lesions.

#### HIGH SPEED

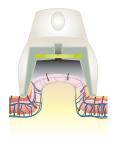

## Introducing LightSheer DUET

#### Rethink the Business of Hair Removal

We've revolutionized the Gold Standard LightSheer with vacuum-assist technology and by dramatically increasing the spot size to  $22 \times 35$  mm. The LightSheer DUET enables you to **treat backs and legs comfortably** in ONly 15 minutes, making hair removal <code>profitable...without anesthetics</code> and gels.

- No topical anesthetic required
- Eliminate prep time
- Reduce treatment times up to 75%
- Differentiate your practice
- Grow your patient base
- Grow your profits

#### High-speed integrated vacuum-assist technology

 vacuum draws skin into handpiece; 2) dermis is stretched thin;
 hair follicle is pulled closer to energy source

melanocytes are spread apart; blood flow is constricted
 energy is applied

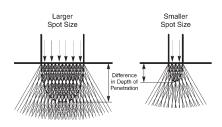

6) skin is released; 7) hair follicles are damaged; 8) tip

- Reduction in competing chromophores enables more efficient delivery of laser energy
- Lower required fluence levels produce a more comfortable procedure, eliminating the need for topical anesthetics

#### depth of penetration

Larger spot size enables greater depth of penetration, for improved absorption of energy at the target follicle<sup>1</sup>

"I've used several laser hair removal devices in my practice... LightSheer remains the 'gold standard' because it is the most effective for targeting unwanted hair. Effectiveness, long lasting results, satisfied patients...all add up to repeat business and positive referrals."

Beth Haney, NP

"Patients will love it. Nurses will love it.... I recently treated a large gentleman's back and in the 20 minutes it took to treat him, he was practically falling asleep – the treatment was that comfortable."

**Christine Dierickx, MD** 

#### Versatile

The LightSheer DUET includes two **optimal wavelength 805 nm** diode hair removal systems on one versatile platform.

#### LightSheer ET 9 x 9 mm spot size

• Fluence up to 100 J/cm<sup>2</sup>

- ChillTip™ continuous contact cooling
- Pulse widths up to 400 ms

#### LightSheer HS

22 x 35 mm spot size

- Largest spot size of any diode
- Integrated vacuum-assist technology
- Pulse widths up to 400 ms
- No cooling or anesthetics required

# Clinical Indications Skin Type: Hair Color: BonderRed Solution Treatment Parameters OptiPulse Auto Fluence 30 Jicni Rate (Hz) Fast ChillTip On OK Cancel

#### Intuitive touchscreens

- Recommended treatment settings
- Customizable treatment presets

#### **Differentiate** your practice

- Treat with 1/10 the pulses—save time and effort
- Make large-area treatments affordable for your patients

Estimated Pulses per Treated Site			ET	XC*	HS
Treatment Site	Est. Area (cm²)	Spot Size:	9x9mm	12x12mm	22x35mm
bikini area	125		154	87	16
underarm (2)	190		235	132	25
man's back	2750		3395	1910	357
full legs (2)	8100		10,000	5695	1052

\*12 x 12 mm spot size available on XC platform only

"The new LightSheer DUET is extremely well tolerated by patients. My hair removal nurse likes the single pulsing for treatment speed and patient comfort. My expectation is the LightSheer diode will perform better as it penetrates deeper...This system is definitely worth pursuing."

Girish Munavalli, MD

1 LUMENIS

"I had my back treated with the new High Speed system in 15 minutes. Normally, this would take about an hour to do, so the time savings alone is significant. ...I think it's a winner."

Mitch Goldman, MD
